

HOW DO I GET THINGS STARTED?

Simply give us a ring and let us know what kind of care you would like, we will be happy to give you advice on all of our services.

We will come and visit you at a time that's convenient and talk face to face about the little things in life that makes all the difference.

We will organise a care plan that meets your individual needs and takes into account any specific needs, difficulties or medical conditions you may have.

We will introduce you to your carer and ensure that your carer knows what your needs are and how to achieve them. Your carer and your care needs will be assessed regularly to ensure you are supported and cared for.

We look forward to hearing from you.

DO YOU NEED SOMEONE TO CARE FOR YOU OR ONE OF YOUR LOVED ONES?

Here at Gloucester Homecare Services we are experienced in supporting and assisting our service users to remain independent in their own homes.

We can assist you in all aspects of care no matter what challenges you face on a day to day basis.

If you are new to receiving help at home and would like a friendly informal chat to see what our service can do for you then give us a call in confidence and we can arrange to visit at a time that's convenient to you.

Whether you are new to care at home or have been receiving care at home for many years, feel free to give us a (no obligation) call to see if our service can be of any benefit.

The Home of Independence

WELCOME

Here at Gloucester Homecare Services we aim to provide a high standard of care to the people we support who wish to live independently in their own homes as we recognise that our services need to be as individual as they are, we will encourage autonomy and person centered care by working with the people we support to an agreed care plan to ensure all aspects of their care needs are met whilst ensuring they strive towards recovery and maintain independence.

We will ensure that the people we support have a good quality of life and are safe and secure, we will provide support to carers, friends and family where needed and respect their views and influences on service developments.

The people that we support can expect us to treat them as individuals and respect the choices they have made and help and encourage them to meet any realistic goals they have set for themselves. We will continue to assess any changing needs of the people we support and respond in a sensitive manner.

All our staff have been trained to meet the national minimum standards and will participate in specific courses to enable us to assist any service user groups..

We are regulated to operate the regulated activity personal care and deliver domiciliary care services in the community. We will comply with essential standards of quality and safety as set by the government.

FOOT CARE

Gloucester Homecare Services offer a wide range of care options which includes foot care. Our staff are level 4 NCFE Non-Surgical Foot Care Specialist practitioners and have achieved diploma status.

We offer....

- Toenail cutting (also for diabetics)
- Filing of toenails
- Bathing of feet
- Cream application to feet
- Practical and useful advice on how to keep your feet healthy

We have recognised that there is a growing need for foot care to be provided at home. It may be that you are not eligible to receive foot care from your local NHS podiatry care service or you may not have anyone else to do it for you. Poor foot care can lead to mobility problems and put people at risk of falls and overall poor general health.

Gloucester Homecare Services offer good value for money and can arrange to visit you at a convenient time. We offer this service independently of any of our other services. We recommend that you have your feet cared for every 12 weeks.
